PREVENT AGING SKIN WITH DR. LUPO'S EXCLUSIVE PREJUVE ENERGY FACIAL

New Orleans, LA – For more than 30 years, Mary P. Lupo, M.D., F.A.A.D., board certified dermatologist and clinical professor of dermatology at Tulane University School of Medicine has pioneered the concept of combination therapies to help her patients achieve a natural, meaningful improvement in their appearance. While she treats patients of all ages, her goal with patients 40 years of age or younger is to get them on a **PRE-ReJUVE**nation treatment plan in order to prevent or delay the signs of aging skin. With early prevention, patients can eliminate the need for aggressive surgical procedures in later years.

The Prejuve Energy Facial is a PRE-ReJUVE nation treatment that is customized for each patient's needs. The most popular Prejuve Energy Facial is the combination of Exilis Elite's skin tightening and Laser Genesis' facial resurfacing for overall anti-aging and enhancement of the skin.

The [Exilis Elite](#) technology is a monopolar radiofrequency device that causes both shrinking of loose tissue immediately, as well as long term collagen production that lifts and tightens loose skin over time. It is beneficial on areas such as the jowls, neck and eyebrows.

[Laser Genesis](#) is a multi-purpose solution for skin health and appearance. The facial resurfacing treatment protects the epidermis, while stimulating collagen production in the dermis to improve pores and texture. It is also shown to fade red and brown spots. It is beneficial for acne and mild acne scars and discolorations.

A Prejuve Energy Facial can treat any skin type and requires no downtime. Dr. Lupo individualizes each treatment so patients achieve optimal results.
